Projects

E-KART

1 Weeks

Developed a full-stack e-commerce platform, E-Kart, allowing users to browse, search, and purchase products. Built using Java for the backend with Spring Boot for RESTful APIs and MySQL for the database. The front end was developed using HTML, CSS, JavaScript,

Travel

- Continuous Learning

and React for dynamic user interfaces. Implemented features like user authentication, cart management, and order processing. Integrated payment gateway and ensured secure data handling with proper validations and error handling.

OFFICE MANAGMENT SYSTEM

1 Weeks

Developed an Office Management System to streamline employee management, task assignment, and resource allocation. Built using Java with Spring Boot for the backend and MySQL for database management. The system enables user authentication, real-time task tracking, and report generation to enhance organizational efficiency and communication.
